Windmill Wash Wax - Cationic Car Shampoo - 5L

Variant code: 06-890

Windmill Wash Wax is a cationic car shampoo designed to deliver **effective vehicle cleaning with added surface protection and enhanced finish**. As part of the Windmill professional cleaning range, it provides a modern, advanced solution for maintaining vehicle appearance while reducing drying time.

This **advanced car shampoo formulation** cleans dirt, road film and general contamination while depositing a **cationic protective film** on the vehicle surface. This film helps to **repel water and promote rapid drying**, reducing streaking and leaving a clean, polished finish. The formulation also enhances water beading, giving vehicles a **"just polished" appearance**, making it ideal for forecourt and presentation use.

Windmill Wash Wax is designed for flexibility in application and can be used diluted in a bucket or applied directly to a sponge for more concentrated cleaning. It dries faster than conventional car shampoos, helping to improve efficiency and reduce the need for additional polishing steps. For best results, the product should be applied out of direct sunlight.

Product Features

- Cationic **car shampoo with protective finish**
- Cleans dirt, grime and road film effectively
- Deposits **water-repellent protective layer**
- Promotes **fast, streak-free drying**
- Enhances water beading for polished appearance
- Suitable for manual vehicle washing

Product Benefits

- Leaves vehicles with a clean, polished finish
- Reduces drying time compared to standard shampoos
- Minimises streaking and water marks
- Enhances vehicle presentation
- Flexible application methods for
